Mathematics of deep learning 2019

Formalities

April 17, 2019

1 The basics

1. Everyone needs to give a presentation in class.

2. For extra credit (7 ECTS instead of 4), you can hand in a term paper. (Probably due end of August; more details to come)

3. You grade is determined by your presentation, your participation in class, and your term paper (if applicable).

4. More information on registration to come.

2 Presentations

1. Send us a list of your 3 favorite papers (ranked) by Thursday, April 25th, and we will assign you a paper.

2. Topics are at `https://coli-saar.github.io/neural-math-19/literature.html`, choose from the main papers, not the additional reading!

3. Duration of the presentation: 20-30 minutes.

4. Meet with us 2 weeks before your presentation, and send us your slides 1 week before.

3 Term paper

More info to come later.
